Dear Kimberly Staiger,

In response to your request for public comments on remediation efforts and treatment of toxic waste sites on Staten Island -- particularly Jewett Ave. / Sedutto's Ice Cream Site, please be advised that my vote is for the Excavation and Off Site Treatment / Disposal of contaminated soils and waste materials. I believe that this proposal is the best proposal to excavate and treat contaminated soil. I also like the idea of using clean back fill to re-fill the contaminated sites as well as the idea to plant new vegetation to these contaminated sites.

Thank you for compiling resident responses.

Kara Buzga
